

# Submission History V3

The V3 tables will require expanding our current site max-width to the 1400px size

Live code version here:  
https://retermb.github.io/HTML-Table-example/

As long as tables are implemented with correct semantic use of HTML row/colspan properties we *shouldn't* need to add aria-rowspan or aria-colspan

Icon names

-  **check\_circle** for Accepted (Hex # 40BB45)
-  **error** for Accepted with Errors (Hex # EC4E11)
-  **cancel** for Rejected (Hex #BB0000)

Icons may need relative positioning to show up in-line with acceptance statuses.

Sized at 20x20 px

Tables should be in a scrollable container. USWDS achieves this via:

```
<div class="usa-table-container--scrollable" tabindex="0">
```

Pa11y tests

- Navigate from Current Submission to Submission History
- Download a file, confirm timestamp is appended and matches
- Navigate through available pages
- Navigate to Error Report
